Currently living in Boston, MA

Today

I'm a digital + tangible product designer from France, currently working as researcher at MIT Senseable City Lab. I design interfaces and build stories to help researchers to develop and communicate their projects. I'm interested in human computer interaction of all kinds. In collaboration with engineers, mathematicians and planners, I use design as a pedagogical tool.

My design is about

Working with people outside of my field — *learning everyday*

Telling stories — *what I have been doing for the past 20+ years*

Questioning everything — *French education*

Having a deep attention to detail — *strong visual and artistic culture*

Outside of my field

Music — *weekly practice for the past 20+ years*

Contemporary art — *mainly visiting exhibitions and galleries*

EXPERIENCE

- 09/2017 - today** · MIT Senseable City Lab
Boston, USA
Designer / Research Fellow
